

HCMA Benefit Provider, athenahealth, offers cloud-based services for your practice!

SCHEDULE A DEMO

If you or your practice manager is interested in speaking with an athenahealth representative and participating in an online demonstration, please [CLICK HERE](#) and provide your contact information and practice name.

*Or contact Elke Lubin at the HCMA office:
813.253.0471.*

athenahealth is a leading provider of cloud-based services for electronic health records (EHR), practice management, patient communication and care coordination, helping caregivers thrive through change and stay focused on patient care. Recognized as an industry leader, athenahealth received five Best in KLAS awards for 2013, including #1 Overall Software Vendor and #1 Patient Portal.

Unlike conventional health IT systems, athenahealth combines cloud-based software, networked knowledge and back-office services to keep more than 67,000 providers on top of the rapid changes in health care-everything from Meaningful Use to value-based payment models. Cloud-based software is continually updated, with a single version available to all providers at once, ensuring physician alignment across the care continuum. And athenahealth teams take on clients' administrative burden, receiving and sorting faxes, tracking claims, managing pre-registration and more.

As physician advocates, athenahealth directly aligns its incentives with clients' performance. Joining the athenahealth network has low start-up costs, with no licensing, server or maintenance fees.

The fully integrated suite of athenahealth services delivers practice management and medical billing, EMR, patient engagement and care coordination via a single cloud-based workflow. All are designed to help

practices and health systems achieve peak clinical and financial performance.

For health systems and hospitals, athenahealth offers athenaCoordinator® Enterprise, the first cloud-based clinical integration and patient access service. This end-to-end solution helps health systems drive both physician and patient loyalty by ensuring smooth care transitions across settings and disparate systems.

athenahealth's additional KLAS honors for 2013 include #1 Overall Physician Practice Vendor, #1 Practice Management Service (for 1-10 and 11-75 physicians), and #2 EHR (1-10 and 11-75 physicians).

With athenahealth as a partner, practices and health systems are well-equipped to connect care and thrive through change, today and in an uncertain future.

Bringing physicians together to advocate for our profession and for the care of over one million patients in our community.
